

AUTOMATIC LADDER

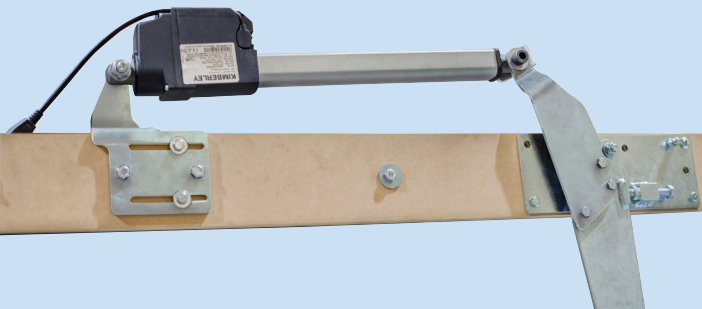

Heavy Commercial Ultimate Series

Remote Control

The Kimberley Automatic Ladder takes access solutions to the next level. Designed specifically for the Heavy Commercial Series attic ladders, the automation kit offers an unparalleled level of safety and convenience.

With the press of a button on the wireless remote control the ladder door gently and silently descends to the open position. You can then extend the ladder to the floor while the Safe Opening System helps ease the ladder to the fully open position.

Simple to use, safe to operate and perfect in so many ways.

FEATURES

- Whisper quiet linear actuators
- Easy to configure open/close positions
- Active security - ladder can only be opened by remote
- Integrated safety system prevents phantom reversing
- Hall effect sensor for reliable and accurate travel limits positioning
- Synchronised actuators for consistent parallel operations
- Active motor lock enabled in closed position to prevent back-driving
- Available exclusively for all Heavy Commercial Ladders - (HC/HCW)

KIT CONTENTS

- 2x Linear Actuators
- 1x Logic Control Module
- 1x RF Remote Control
- 1x Mounting Hardware Kit

Note: Kimberley strongly recommend adding a supplementary access manhole. This accessory must be ordered with a new HC/HCW code ladder. It is not available as an after market or retrofit option.

SPECIFICATIONS

- Option Code: KASARL-01
- Life Cycle: 10,000+ operations
- TX Range: Up to 15m
- TX Battery Life: Up to 10yrs

Security & Convenience

The Kimberley Automatic Ladder operates only via remote control. This offers a level of security that makes it ideal for adding a "lockable" storage space to a holiday home, rental property, or where restricted access is necessary at a commercial site.

OPTIONS

- Battery back-up
- Clipsal C-Bus Home Control
- Telstra Smart Home compatible
- Bluetooth Receiver - use a smart phone/tablet as the remote control
